CHETCHA SHEERYL JOLENE

COMPUTER SCIENCE STUDENT

Computer Science student with two years of university-level study at Pkfokam Institute of Excellence. I enjoy coding, building projects and learning how data can be used to solve problems. I am interested in software engineering, data and artificial intelligence.

Work experience

Internship

June 2025
August 2025

CAMPOST (Cameroon Postal Service), Yaoundé

- Completed a three-month internship focused on IT systems.
- Learned the concept of virtualization, which type of hypervisor you need to install, and how to install servers on them. Also learned how a server communicates with multiple computers connected to it in the virtualized environment.
- Learned how Active Directory can be used to manage computers, install software across multiple computers in an organization, change wallpapers and more.
- Gained practical exposure to FortiGate. How the server can share internet to other computers through the FortiGate.

Education

Computer Science

2023
2025

Pkfokam Institute of Excellence, Yaoundé

- Completed two years of university-level coursework.
- Relevant coursework: Programming in C, Python Programming, Programming and Problem Solving, Discrete Mathematics, Calculus I–III, Data Structures, Database Systems, Web Development and Physics.

GCE Advanced Level

2022
2023

Franky Comprehensive Secondary School, Yaoundé

GCE Ordinary Level

2020
2021

Franky Comprehensive Secondary School, Yaoundé

STEM EXPERIENCE

Summer STEM Boot Camps

2018
2018

- Learned Scratch, Python and Django; developed a small application inspired by ride-hailing services.

Summer STEM Boot Camps

2019
2019

- Learned electronics, Arduino and embedded systems; worked on an automatic tap prototype.

Summer STEM Boot Camps

2020
2020

- Coordinated the STEM boot camp, supporting teachers and students.

Academic Projects

Pickup-Restaurant Pre-Order

Yaoundé

It is a mobile-based system that enables customers to place and pay for their orders in advance before arriving at the restaurant. By requiring mandatory pre-payment and allowing customers to select predefined pickup time slots, the system ensures that only confirmed orders are processed, improving reliability and reducing uncertainty in demand.

Computer-to-computer communication

Yaounde

Creating a simple version of WhatsApp in Python to communicate between computers.

Python Chatbot

Yaounde

Creating a user-friendly chat in Python. The chatbot was able to answer daily questions like good morning, How did you sleep and others.
